

WHICH DRIVER IS MORE LIKELY TO CRASH?

Can you tell?

Driver A

Some people are more likely to crash than others, will it be driver A or B?

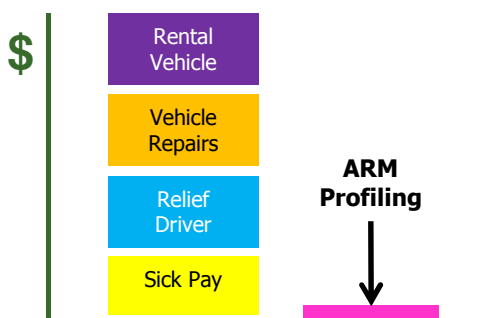

Driver B

CCS Innovation in Logistics Ltd can help you determine the risk of a potential employee by **Accident Risk Management (ARM) Profiling**

A poor attitude to safety means a likelihood to crash

HOW WOULD YOU RATHER SPEND YOUR MONEY?

How ARM Profiling fits with your recruitment process:

- 1 Interview applicants and carry out practical driving assessment
 - 2 Send the candidates to us at *CCS Innovation in Logistics* for ARM profiling
 - 3 Receive and review our summary of the ARM results
 - 4 Clarify any concerns with the candidate
 - 5 Make employment decision
 - 6 Carry out normal checks e.g. References and Drug & Alcohol
 - 7 Confirm employment decision
- ✓ Employ the right candidate

Used in conjunction with your current pre-employment process, **ARM profiling** helps you to find out whether a driver will **make you money or cost you money**
